

Cabinet Arrival Instructions (for homeowners and contractors)

You will be given a set of up-to-date plans with your cabinet delivery.

We recommend checking your cabinets AT LEAST 2 WEEKS before demo of your existing space. This gives us time to reorder anything damaged and keep your install on schedule.

When opening or checking cabinets please NOTE on your plan WHICH cabinet is damaged and whether it is the cabinet BOX or door/drawer front. A damaged BOX may hold up the countertop template so call us with any questions!

We will need to know the cabinet code (written as B09 or W3636 etc) and where it comes from on your plan (in case there are multiples of the same cabinet).

PLEASE snap a photo of the damage as best you can and send it with the cabinet code to your designer's email so we can make a timely replacement request.

All of our cabinets come with manufacturers' warranties. The sooner we know what issues exist, the faster we can get replacements and get your kitchen finished!
